PLAN PRIMERAS CLASES (ANTES DEL CONTROL 01) I. Incertidumbre y su Impacto en los Mercados Financieros II. ¿Cómo desarrollaremos el curso? III. ¿Por qué son importantes los Mercados Financieros? IV. Decisiones de Consumo e Inversión bajo Certidumbre

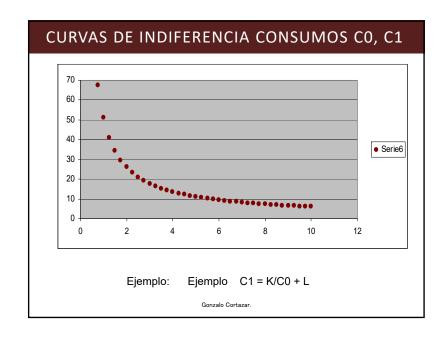

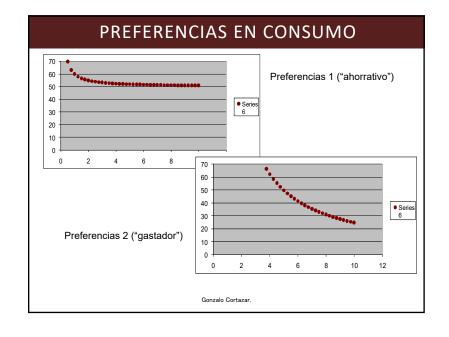

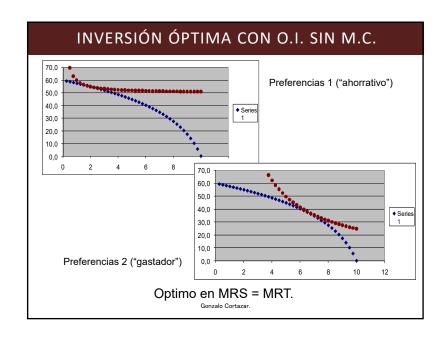

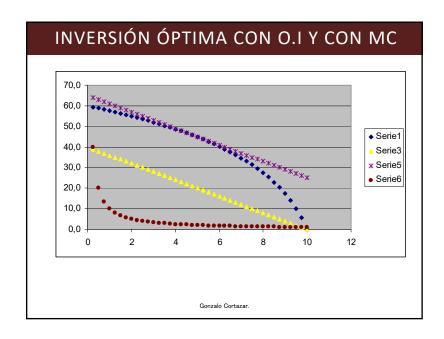

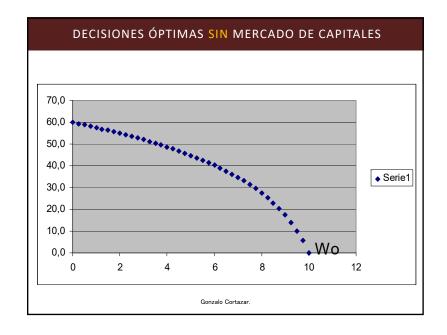

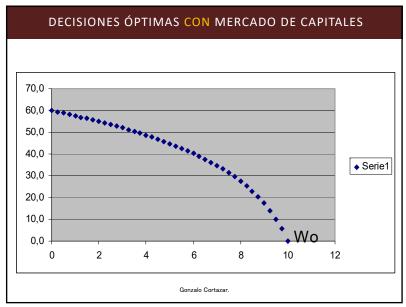

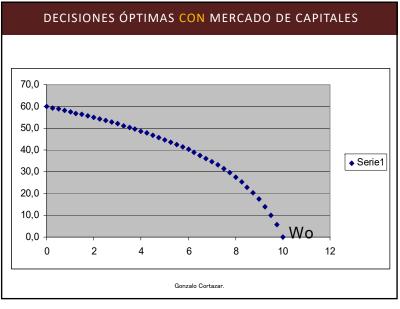

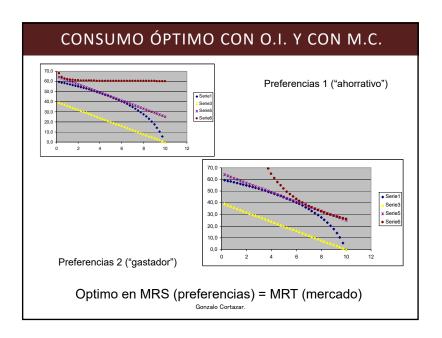

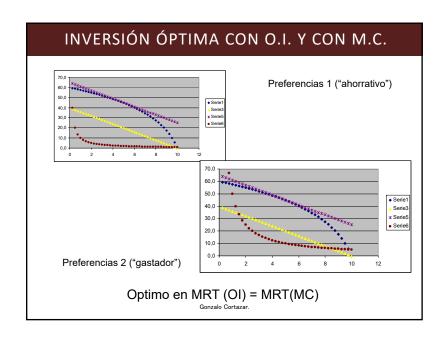

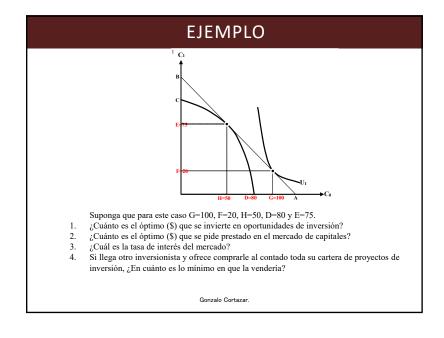

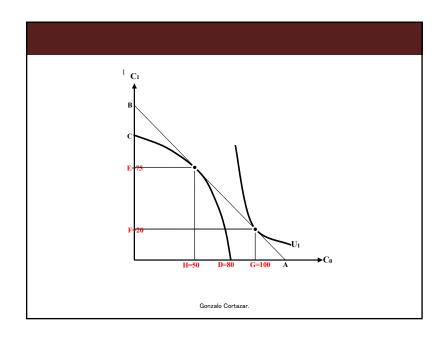

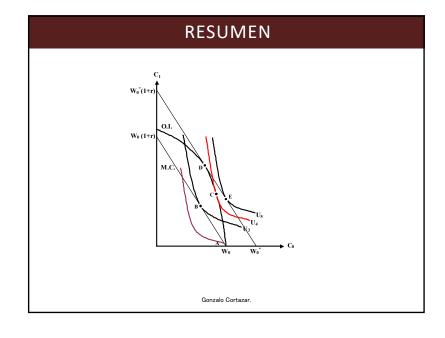

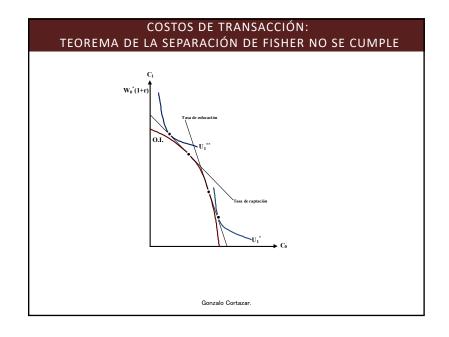

Con Mercado de Capitales las distintas preferencias de consumo se expresan en la inversión o endeudamiento en el mercado de capitales

Decisiones de Inversión no dependen del Financiamiento

Teorema de la separación de Fisher

Gonzalo Cortazar.

VPN-VAN

El valor Presente Neto (o Valor Actualizado neto) representa el potencial incremento en consumo hoy producto de la inversiones

Para tener VAN positivo la rentabilidad de la inversión (MRT) debe ser mayor a la tasa de interés

Gonzalo Cortazar.
